

SPUD CAN CONSTRUCTION

Building on 40 years of MODU experience our personnel are extremely well versed in all aspects of design, construction and fabrication of these complex components. From structural welding compliant with ABS regulations to detailed assembly we know what it takes to produce an accurate spud can.

Our new facilities in Orange, Texas provide over 50 acres of deep water accessible fabrication lay down and construction space. Beacon Maritime provides a truly turn key solution for large marine fabrication.

For more information about spud can solutions contact Beacon Maritime.
